List accessible databases to this connection

Version 4.0.24.14 (latest)

List databases available to this connection

Certain dialects can support multiple databases per single connection. If this connection supports multiple databases, the database names will be returned in an array.

Connections using dialects that do not support multiple databases will return an empty array.

Note: [Connection Features](#) (/looker/docs/reference/looker-api/latest/methods/Metadata/connection_features) can be used to determine if a connection supports multiple databases.

Request

GET /connections/{connection_name}/databases		
	Datatype	Description
Request	HTTP Request	
path	HTTP Path	
<div><div>+</div>Expand HTTP Path definition...</div>		
connection_name	string	Name of connection

Response

200: Database names	400: Bad Request...	404: Not Found...	422: Validation Error...
(#200:-database-names)			

	Datatype	Description
(array)	string[]
